

NAVY WARFARE DEMO MASS PROCESSES

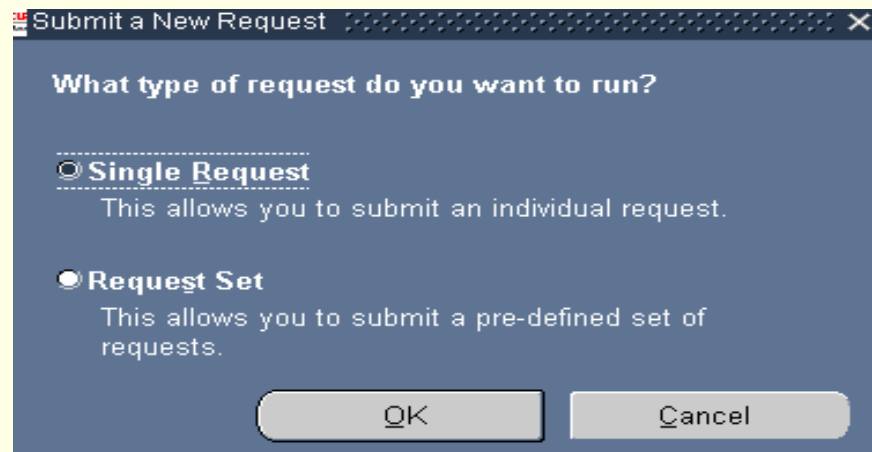

First Process is "NSWC NUWC DEMO MERIT PAYOUT" (Continuing Pay)

STEP	ACTION
1	<p>Ensure the flat file containing all the data to update the records has been loaded to the staging table. The file must be resident on the server where the process will be executed. Normally the HRO completes this file and provides it to the HRSC. Sample file layouts are at the end of this document. When they are ready to run the payout the HRSC will email the file to OCHR-SA. OCHR-SA will coordinate with CPMS and LMSI to have the file staged to a table (think of this as a holding area for data) named "Civ_Demo_3_Merit_Payout" and an extract of it made. OCHR-SA will provide a copy of the extract data to the HRSC and HRO in an Excel spreadsheet. The extract allows the HRSC and HRO to verify that the data has loaded correctly before running the payout process.</p>
2	<p>Once the extract has been reviewed and verified - Log into DCPDS as CIVDOD SYSADMIN HR MANAGER or US Federal HR Manager.</p>
3	<p>From the Navigation List – Click on Processes and Reports → Submit Processes and Reports → <Open>.</p> 

4

The **Submit a New Request Window** displays. Select "Single Request".

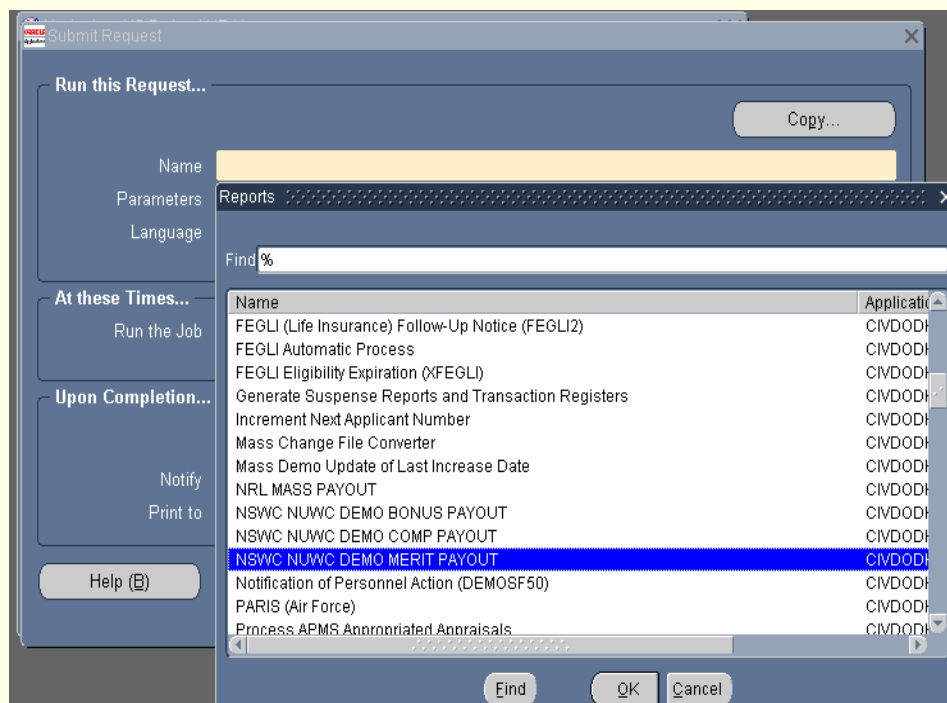

- Click <OK>.

5

The **Submit Request Window** displays.

- Click in the "Name" data field – Click on the LOV and Find "NSWC NUWC DEMO MERIT PAYOUT".
- Click <OK>.

6

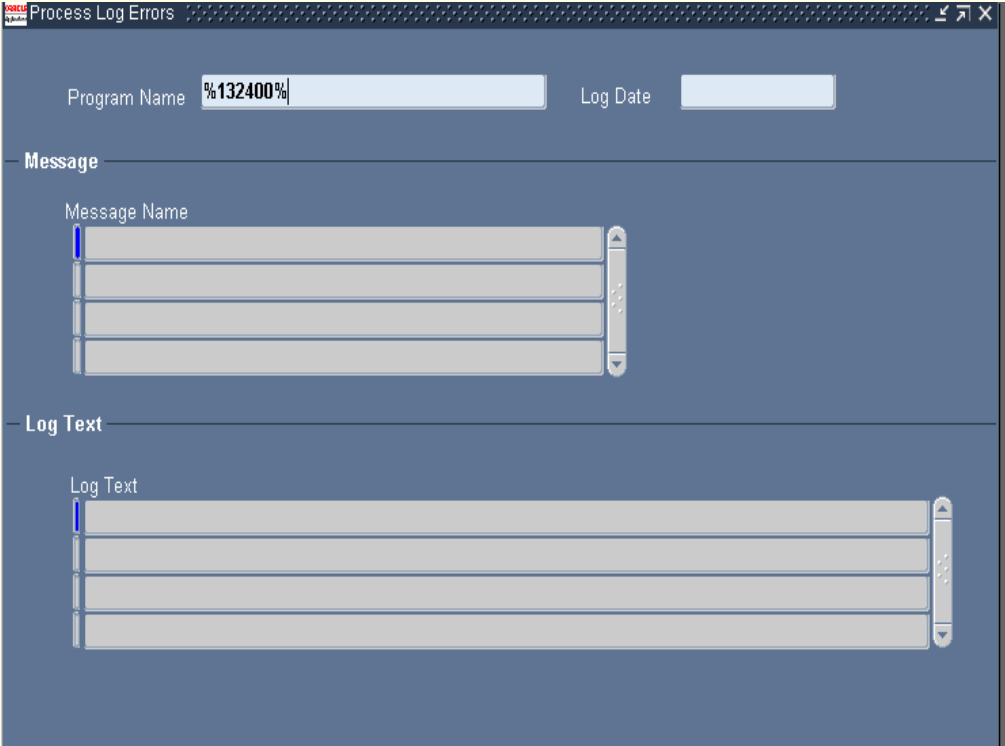

- Select the appropriate printer.
- Click **<Submit>**

7

To check the status of the process:

- From the Main Menu Bar – Click on **View → Requests**.
- The **Find Request** Window displays – Click **<Find>**.
- The Requests Window displays – You can Click the **<Refresh Data>** button to re-query checking for the “Phase” to reflect “Completed”.
- Make a note of the Request ID number, you will need it to query the process log.

Request ID	Name	Parent	Phase	Status	Parameters
132435	Payroll Interface Update		Completed	Normal	16-MAY-2003, 21
132434	Eject Report Procedure(C		Completed	Warning	NPHR2
132433	Payroll Reverse Interface		Completed	Normal	16-MAY-2003, 42158, 07/22-MAR-200
132432	Payroll Reverse Interface		Completed	Normal	16-MAY-2003, 42338, 08/05-APR-200

Log Text

A total of [0] records processed with [0] records processing in error.

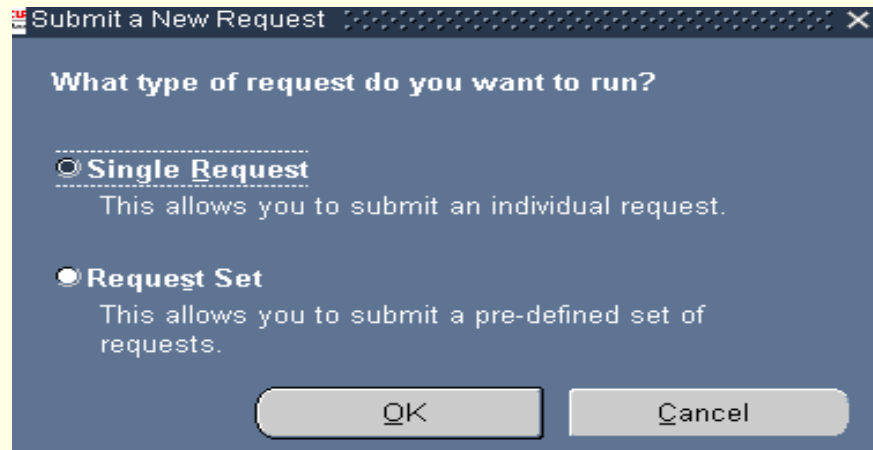

Third Process is "NSWC NUWC DEMO COMP PAYOUT"

STEP	ACTION
<p>1</p> 	<p>This process does not have a flat file or staging table. The user is prompted to input "Increase Percent" and the "Effective Date" as concurrent manager parameters. The code will recalculate the employee's Basic Pay, Locality Adj, Adj Basic Pay, and Total Salary.</p> <p>CAUTION: There is no mass undo or halt – once this process is started it will run to completion and if the parameters input were in error then each NPA will have to be <u>individually</u> cancelled or corrected!</p>
<p>2</p>	<p>Log into DCPDS as CIVDOD SYSADMIN HR MANAGER or US Federal HR Manager.</p>
<p>3</p>	<p>From the Navigation List – Click on Processes and Reports → Submit Processes and Reports → <Open>.</p> 

4

The **Submit a New Request Window** displays. Select "Single Request".

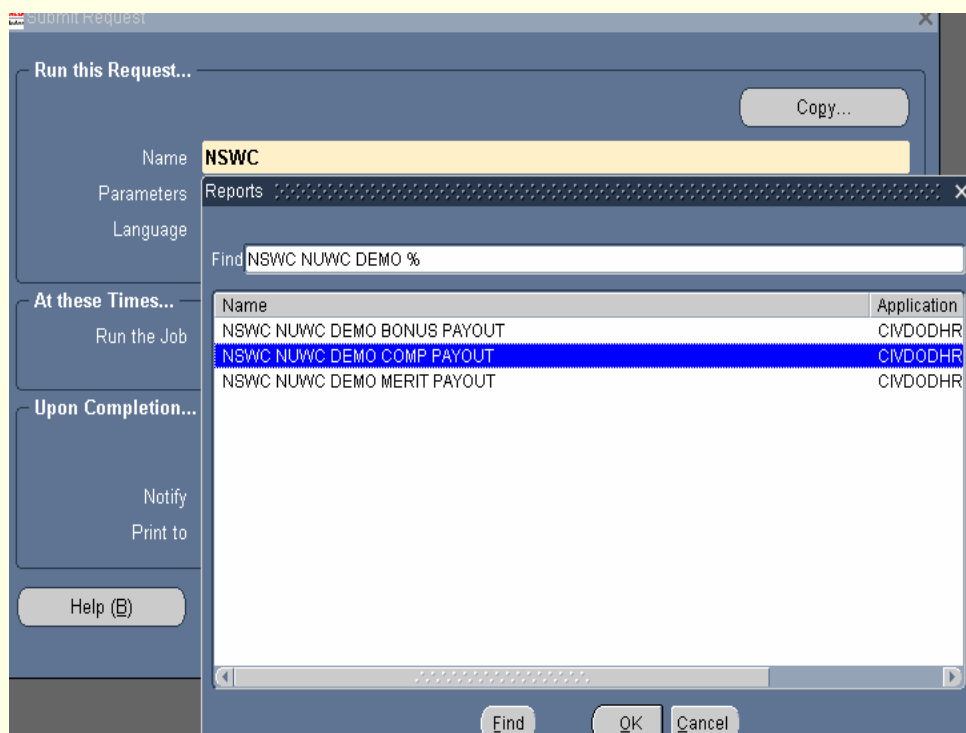

- Click <OK>.

5

The **Submit Request** Window displays.

- Click in the "Name" data field – Click on the LOV and Find "NSWC NUWC DEMO COMP PAYOUT".
- Click <OK>.

6

- Input the **Increase Percent** (in the format 3.1 for a 3.1% general increase)
- Input the **Effective Date**
- Click **<OK>**

The 'Submit Request' dialog box is shown with the following fields and options:

- Run this Request...**
 - Name: NSWC NUWC DEMO COMP PAYOUT
 - Parameters: (empty)
 - Language: American English
 - Buttons: Copy..., Languages...
- At these Times...**
 - Run the Job: As Soon as Possible
 - Buttons: Schedule...
- Upon Completion...**
 - ☒ Save all Output Files
 - Notify: (empty)
 - Print to: 0A_DUMMY_PTR
 - Buttons: Options...
- Parameters (Sub-dialog):**
 - Increase Percent: 3.1
 - Effective Date: 12-JAN-2003
 - Buttons: OK, Cancel, Clear, Help
- Main Dialog Buttons:** Help (H), Submit, Cancel

7

- Select the appropriate printer.
- Click **<Submit>**

The 'Submit Request' dialog box is shown with the following fields and options:

- Run this Request...**
 - Name: NSWC NUWC DEMO COMP PAYOUT
 - Parameters: 3\1.12-JAN-2003
 - Language: American English
 - Buttons: Copy..., Languages...
- At these Times...**
 - Run the Job: As Soon as Possible
 - Buttons: Schedule...
- Upon Completion...**
 - ☒ Save all Output Files
 - Notify: (empty)
 - Print to: 0A_DUMMY_PTR
 - Buttons: Options...
- Main Dialog Buttons:** Help (H), Submit, Cancel

8

To check the status of the process:

- From the Main Menu Bar – Click on **View → Requests**.
- The **Find Request** Window displays – Click **<Find>**.
- The Requests Window displays – You can Click the **<Refresh Data>** button to re-query checking for the “Phase” to reflect “Completed”.

Make a note of the Request ID number, you will need it to query the process log.

[illegible]

9

- The NPAs can be printed individually through Ghostview or you may print them using the Batch print process or they can be printed through COGNOS.
- Errors, if they occur, will be found in the Process Log and the RPAs will be routed to the WGI Personnel Inbox.

10
**Process
Log**

To view the Process Log – From the Navigation List – Click on **Federal Maintenance Forms → Process Log(Federal) → <Open>**

11

The **Process Log Errors** Window displays.

To query on the Request ID number that you wrote down from step 7:

- Click in the **Program Name** data field - Press **F11** and type %Request ID number%
- Press **Ctrl F11** to execute the query.

The screenshot shows the 'Process Log Errors' window. At the top, there are two input fields: 'Program Name' containing '%131945%' and 'Log Date' which is empty. Below these are two sections: 'Message' and 'Log Text'. Each section has a list box with a vertical scrollbar. The 'Message' list box is currently empty. The 'Log Text' list box is also empty.

12

The process log shows all records that processed successfully and the records that processed in error.

Note: You may export the process log text to a file for easier analysis if desired.

The screenshot shows the 'Process Log Errors' window with updated data. The 'Program Name' field now contains 'NSWC NUWC COMP-131945' and the 'Log Date' field contains '15-MAY-2003'. In the 'Message' section, the list box contains three entries: 'PROGRAM COMPLETE', 'UNKNOWN ERROR', and 'Unable to create SF-52'. In the 'Log Text' section, the list box contains one entry: 'A total of [292] records processed with [292] records processing in error.'

Sample File Layouts

Warfare Demonstration Project

Note: The code for these routines is looking for “TEXHD” at the beginning and a TEXTR at the end of these files. Spacing is critical in these files. The file formats must not be modified under any circumstances without submitting a system change request first. If even one character is changed, it offsets the file and the program will not be able to read it in correctly and store the data in the proper area of the staging table.
